DETAILED ACTION

In response to the Request for Continued Examination (RCE) under 37 CFR

1.114 filed on 8/26/09, The amendments filed on 8/26/09, claims 1 and 20 have been amended.

Claims 1-6, 9-17, 19-21, and 23-31 are pending in the current application.

REASONS FOR ALLOWANCE

1. Claims 1-6, 9-17, 19-21, and 23-31 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The claims of the instant invention are directed towards a gaming method wherein a gaming machine incorporates a display of a first set of virtual reels on a first display screen wherein the first array includes at least one special symbol in a first position of the first array. The player is granted an award to the player for the first game based upon combinations of symbols including combinations of symbols that include the one special symbol. Additionally, the instant invention concurrently displays a second display wherein a second array of symbols which are selected at random produce an independent outcome of the game separate from that of the first display screen. The instant invention utilizes the special symbol to shift positions between the two independent set of virtual reels in order to produce and alter the originally displayed outcome while concurrently altering and affecting the awards that are awarded to the player.
4. As indicated by the applicant's remarks submitted on 8/26/09, the closest prior art of Webb describes various games where a set of reel displays and markers are provided for the user. Associated with each reel is a game board (bingo board 102 in

Fig. 6) which can be interpreted as the dual displays of the instant invention, however the instant invention distinguishes from the prior art as the secondary game display of Webb fails to produce a secondary game outcome that is generated independently of the symbols of the first array as is required by the recited limitations of the instant claims.

5. With respect to Visocnik, a special symbol is taught that is able to move around in a symbol array and change the displayed outcome when it appears on the displayed array. However, Visocnik does not fairly teach or suggest the movement of the special symbol from one displayed array to a separately displayed reel on a separate display screen.

6. Additionally, the cited prior art of Cregan and Baerlocher fail to cure the deficiencies to Webb and Visocnik as they are disclosed alone or in combination. Therefore the recited limitations of the instant claims are not suggested or fairly taught by the prior art of record. The ability to move between the two concurrently separate display screens is therefore a patentable feature over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
